INTRODUCTION

Ayurveda is arguable one of the oldest traditional system of medicine in practice today. Ayurveda believes that the health of an individual depends on ability to live in harmony with oneself as well as the external universe. It has always preached "Prevention is better than cure" Ayurvedic treatment is generally administered after the Physician has a complete understanding of the Prakriti or body type of a person. The good thing about this science is that it can maintain health in the healthy and cure diseases in the unhealthy. Ayurvedic medicines are prepared using herbs, minerals as well as some animal derivatives. Contrary to popular belief Ayurvedic medicines are potent enough to cure certain problems quickly, provided the correct medication is correct dosage at the right time. This system can give tremendous relief to patients suffering from chronic ailments like Arthritis, Skin, Bronchopulmonary, Cardiovascular and life style disorders. It is however best to seek the advice of a qualified Physician and undergo a proper course of treatment for best results.

Sadvaidyasala was founded in 1913 by Late Revered Bhisagratna Ayurveda Vidwan B.V.Pundit. It is one of the oldest concerns manufacturing Ayurvedic medicines in Karnataka. The preparations include both Pharmacopoeial (Formulae as per the books listed in the schedule 'Q' of the Drugs and Cosmetics Act and Ayurvedic Proprietary preparations formulated by the founder and further generations by the rich experience in the field of Ayurveda. These preparations have been meticulously tested for their efficacy before being released into the markets as a licensed Ayurvedic medicine.

The Company currently manufacturing over a 180 products which include Asava & Arishtas (Medicated wines), Lehyams (Confections), Arkas (Distillates), Churnas (Powders), Tailas (Medicated Oils), Ghritas (Medicated Ghee), Vatis (Pills), Tablets and Capsules, Syrups and Ointments. Our Lehyams are specially appreciated for their palatability, consistency and preserving qualities. The Asava/ Arishta's are prepared in strict conformity to the Shastric principles and stored in teak wood vats. We strongly believe that results of Ayurvedic preparations are best seen if they are prepared in the traditional manner. Some of our products like Bhavana Shunti, Srikara Amodini, Srikara Kasturi Pills, Roso Gulkhan, Sarasaparilla Syrup, Balashobha, have all gained immense popularity for their unique taste and curative properties.

The Sadvaidyasala is now being managed by the third generation of the family, it is a closely held Private Limited Company. The Management is committed towards maintaining high standards of manufacturing and business ethics which have been the hall mark of our Company since its inception. The Company has a 15 bedded Ayurvedic Hospital in the name of the Sri Dhanvantari Arogyashram Trust, where both inpatient and outpatient facilities have been provided. The Arogyashram was established in 1961 and has treated over five lakh patients over the years. The Management of Both the Company as well as the Trust are committed producing high quality products to its customers but also provide efficient service to Doctors/ Vaidyas, Distributors and Dealers.

ASAVAS & ARISHTAS

Asava and Arishtas are classical Ayurvedic preparations that contain self generated alcohol. Arishtas are prepared as a hot decoction by boiling medicinal herbs with water and after cooling allowed to ferment with the addition of jaggery and honey. Asava's are prepared by making a sheetha kashaya (cold decoction) i.e., by adding boiled cooled water to the herbs, taking the decoction by squeezing and then allowing to ferment with the addition of jaggery and honey. Fermentation of these decoctions leads to the formation of self generated alcohol to a maximum of 12%. The active ingredients of the herbs are extracted into the decoction first and also in the self generated alcohol making the product effective. Most Asavas and Arishtas can be stored for long number of years unless otherwise mentioned. B.V.Pundit's Arishtas are known for their quality and efficacy and are also known to work at lower dosages.

Most of our Asava, Arishtas are available in 200ml, 500ml and 1000ml.

1. ABHAYARISHTA

(B. R. Arshorogadhkara)

Chief Ingredients: Haritaki Vidanga, Trivruth Madhuca.

Indication : It is the best medicine for the treatment of both internal and external piles It promptly relieves the excruciating pain and checks bleeding in piles, It is also useful in constipation, tympanites.
